- **Specialisation Subjects** – Artificial Intelligence and Machine Learning

NOTABLE INITIATIVES

• VOICE ASSISTANT

The voice assistant can send mails, open the websites, play Music, tell the time, search anything on Wikipedia, open Applications and greet you in real time on voice commands. The project has been created using Python

• Website Blocker

The pop-up / website blocker creates targets the vulnerable group like children and adults who are not technology savvy. We aim to enable these group being exposed to malicious website with a simple click of button. You can set the time for which a particular site remains blocked.
